1. ABSTRACT

EMAP digitized and centralizes the Final Year Project process, form proposal submission to final evaluation. It replaces manual workflow with an integrated, transparent, real-time system.

2. PROBLEM STATEMENT

- Manual and fragmented FYP processes
- Delayed approvals and poor tracking
- Scattered communication
- across reles
- Limited visibility of progress and records

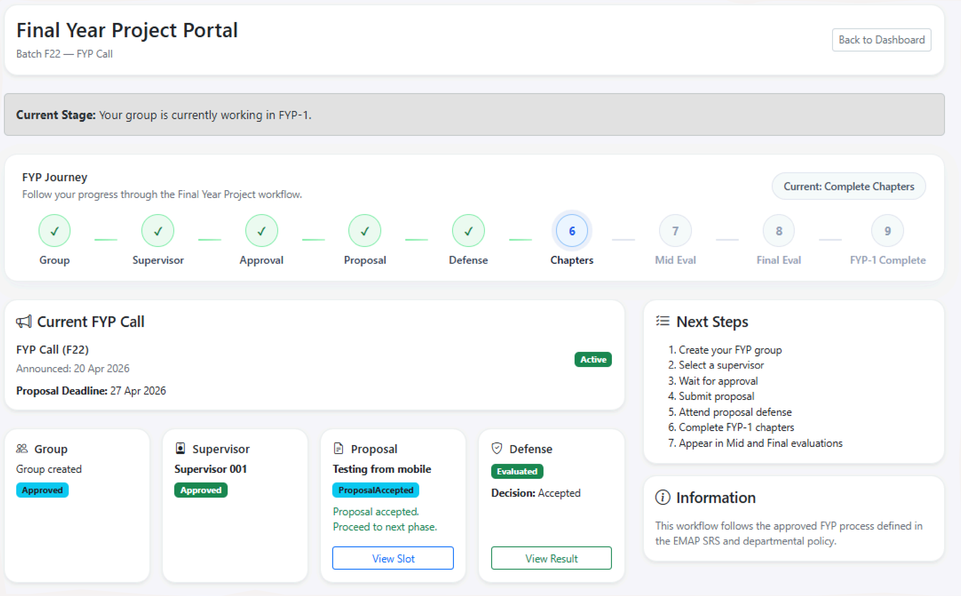
2. PROPOSED SOLUTION & OBJECTIVES

- Centralized the complete FYP lifecycle
- Provide role-based dashboards and workflow
- Secure approvals, chapters, evaluations, and feedback
- Improve transparency, coordination, and record management

4. METHODOLOGY / WORKFLOW

1. FYP Kickoff & Topic Proposal
2. Proposal Submission
3. Topic Supervisor Assignment
4. Proposal Evaluation
5. Chapter Submission
6. Review & Feedback
7. Revision Workflow
8. Evaluation & Moderation
9. Final Evaluation
10. Result Release
11. Record Archive

5. SYSTEM INTERFACES



4. TECHNOLOGY STACK & TOOLS

C# | ASP.NET | Bootstrap | CSS | Git | GitHub | SQL | Microsoft .NET

7. RESULTS / IMPACT

- Faster approval and review cycle
- Improved visibility and tracking
- Better Coordination across roles
- Reduced manual work and paperwork
- Secure and centralized record management
- Data-driven insights and reporting

8. Conclusion

EMAP modernizes the Final Year Project process by integrating all stackholders into a single, secure platform. It enhances transparency, accountablity, and efficiency from proposal to final evaluation
